

IN THE ABSTRACT

Please replace the Abstract of the disclosure with the revised Abstract provided, herewith, on a separate sheet of paper.

IN THE CLAIMS

Please cancel claim 3 without prejudice or disclaimer.

sub 1
B2
1. A fibre reinforced plastic roofing material comprising a sandwich structure where a pair of sheets comprising fibre reinforced plastic is arranged with a gap between them and a rib structure which is integrally molded by a resin transfer molding process to the pair of sheets is interposed, wherein the fibre reinforced plastic includes a reinforcing fibre that is selected from the group consisting of a carbon fibre, a glass fibre and carbon fibre hybrid, and combinations thereof.

SUB 1
2. A fibre reinforced plastic roofing material according to Claim 1 where the pair of sheets have a thickness of from 2-10 mm.

4. A fibre reinforced plastic roofing material according to Claim 1 the rib has a thickness of from 1-3 mm.

SUB 1
B3
5. A fibre reinforced plastic roofing material according to Claim 1 where the reinforcing fibre of the fibre reinforced plastic comprises a multiaxial woven material having a fibre direction at an angle of $45 \pm 10^\circ$ to the lengthwise direction of the rib structure.

6. A fibre reinforced plastic roofing material according to Claim 1 where the fibre reinforced plastic is carbon fibre reinforced plastic.

7. A fibre reinforced plastic roofing material according to Claim 1 where the fibre reinforced plastic is a hybrid fibre reinforced plastic of carbon fibre and glass fibre.
